Course Number = T-454-03

Scheduled for February 25, 26, 27, 2003

12:00 - 5:00 PM ET

Effective Permit Writing

Broadcast Highlights

This course presents information on the major national programs in air pollution stationary source permitting. This course was designed to provide hands-on training in the methods and procedures used to effectively draft and review permit conditions used with a variety of permit programs. This course is designed for personnel of Tribal, State and local permitting agencies who are new to permit programs, managers of programs which are impacted by permits, and inspectors who must read and interpret permit conditions. Examples of the various types of permit conditions are presented along with practical exercises to hone the participant's skills.

Topics to be covered:

- Identification of the components required in a complete permit application evaluation
- Explanation of the functions and purposes of each component of a complete permit application
- Description of the characteristics of an effective permit
- Explanation of the process and approaches that can be used to assure an effective permit is produced.

Registration Information

You must pre-register for this course. Applicants should register with APTI two weeks prior to the first broadcast day. Submit your APTI registration form(s) via fax to 919-541-5598 by the deadline, February 11, 2003. Exams must be received before two weeks following the last day of broadcast. You must successfully pass the post test with a score of 70 in order to receive a certificate and the 2 CEU. Please consult your local site coordinator about APTI registration.

For more information about APDLN, including upcoming broadcasts talk with your downlink coordinator or visit our web-site at www.epa.gov/air/oaqps/eog
